

ECG Cart

Diagnostic Equipment Cart

The Midmark Diagnostic Equipment Cart is the optimum cart. It allows you to easily move your equipment from room to room, quietly and quickly on 3" double wheeled, soft casters. Depressions integrated in the top not only provide convenient handles for transporting this cart, but also keep your laptop safe during transport.

Positioning the compact cart at the patient's side is easy with fingertip control. Two lockable casters secure the cart in place. The five-legged base provides stability for the cart and its contents.

The 36" working height makes this an efficient cart, when you're standing next to the patient, because you have easy access to your devices or laptop computer. It can hold up to 40 pounds of equipment!

The unique vacuum formed KYDEX® sheet 19" x 18 7/8" top contains ample room for a laptop computer. A holder for the Midmark Diagnostics Group IQmark™ Digital Spirometer is integrated in the top surface. A gooseneck arm holder conveniently stores the IQmark™ Digital ECG acquisition module. It can be mounted on the righthand or the lefthand side of the cart.

The KYDEX® sheet top is seamless, easy to clean, moisture resistant and very durable. A 15" x 7 1/4" shelf provides a convenient area for a printer.

Cord management is a challenge in medical facilities today. The Midmark Diagnostic Equipment Cart provides two 4" cord management cleats on the back to keep cords up, off the floor. A bin is provided on the back of the shelf for additional cord management.

You also get electrode and pneumotach storage with our 15" x 17" Hettich™ Multi-Tech™ Drawer. Its integrated, seamless, molded handle gives the drawer a sleek look in addition to being easy to clean.
