Cleaning Solutions

Midmark Ultrasonic Cleaning Solutions effectively clean blood, tissue, and mucus fast and effectively. General Purpose Cleaner, Tartar and Stain Remover, and Enzymatic Cleaning Solution do the work for you.

Cassette Racks

The M250 Cassette Rack holds three 8" x 11" cassettes.

"The M250 Soniclean will not accept the standard 8" x 11" HuFriedy® cassette. A special HuFriedy 8" x 10.5" cassette (Part# IM416Q) is available for use in the M250 Soniclean.

The M550 Cassette Rack holds six 8" x 11" cassettes.

Accessory Kit

Accessory kit includes safety basket, beakers with lids, rings and positioning cover. (M250 kit shown)

Accessory Kit with Half Basket

Accessory kit includes safety basket, beakers with lids, rings, positioning cover and basket lid. (M250 kit shown)

Midmark is an ISO 9001 Certified Company.

Because we care.

SONICLEAN®

M250 Soniclean®
Ultrasonic Cleaner

QUIET

Midmark Soniclean Ultrasonic Cleaners are some of the quietest in the healthcare industry.

No one will argue that ultrasonic cleaning is the fastest, most consistent and safest method of cleaning instruments and components. But because ultrasonic cleaners emit a high pitched sound, no one ever accused them of being quiet... until now.

The Midmark Soniclean uses a high frequency transducer that allows the unit to perform quietly. Tiny cavitation bubbles are produced with the higher frequency, allowing the bubbles to penetrate smaller crevices. This results in a powerfully quiet ultrasonic cleaner.

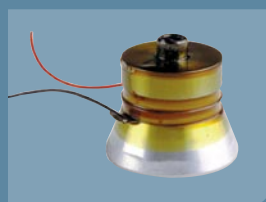

The Midmark Soniclean is extremely easy to operate - simply load your instruments and set the timer.

The external drain is very accessible and easy to use

Recess unit for a lower profile

Unique, Stack Transducer

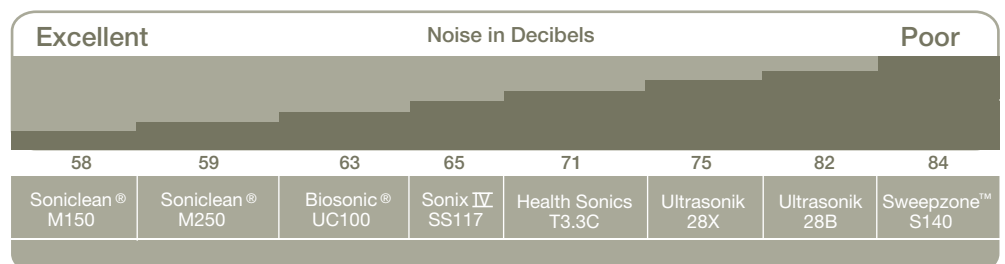

You'll be impressed with how effectively the Soniclean handles your instrument cleaning needs. Other ultrasonic cleaners use a standard slim wafer transducer, limiting the maximum sound pressure that can be generated to 2-3 watts per square inch.

The Soniclean utilizes an industrial-type ultrasonic stack transducer, resulting in a cleaner that is capable of reaching 12-15 watts per square inch. This superior acoustic pressure generated by the stack transducer, coupled with the Soniclean's Overlapping Wave Frequency (OWF) technology, produces powerful cavitation. More power in the tank translates to cleaning your instruments more efficiently.

Every office has different ultrasonic cleaning needs, depending on the number of patients and the types of procedures being performed. That's why Midmark provides you with three size options that can be placed on the countertop or even recessed.

An independent national laboratory ranked the Soniclean "the quietest ultrasonic cleaner" among all units tested. In addition, it was the only unit ranked "excellent" for noise comfort. That's important for your staff and patients.

Soniclean is ranked quietest among this group of ultrasonic cleaners by an independent national organization.
