

DRE Vision LED

Surgery Light

Provides unsurpassed longevity and flexibility

The DRE Vision LED is a large diameter surgery light system offering five-stage dimming and exceptional shadow control. Ideal for large surgery suites and operating rooms, the DRE Vision LED is available in an array of mounting options.

Controlling the positioning and brightness of the DRE Vision LED is easy with the autoclavable handle. The light emits virtually no radiant heat, keeping clinicians cool and comfortable even during lengthy surgical procedures. The DRE Vision LED is highly efficient, producing unsurpassed illumination with economical energy consumption.

FEATURES

- › Affordable surgical lighting system offers longevity and flexibility.
- › Large diameter LED array with exceptional shadow control.
- › Five-stage dimming for a wide range of surgical procedures.
- › Maximum output rated at 100,000 Lux.
- › 4,300 Kelvin bright white illumination.
- › Color Rendering Index: 97. Long-life LED's rated at 50,000 hours.
- › Dimming and on/off switch controlled by autoclavable handle.
- › Light array emits virtually no radiated heat.
- › Available in a wide array of mounting options — ask your DRE representative for more information.

SPECIFICATIONS

Number of LEDs: 36

Output:
100,000 Lux @ 39.4in (1m)

CCT: 4,300° K

CRI: 97

Focal length: 39.4in (1m)

Dimming levels: 5

Dimming percentages:
100%, 87%, 75%, 62%, 50%

Endo mode: Yes

Light field (d10):
≈Ø8.3 in (Ø209 mm)

Light field (d50):
≈Ø4.9 in (Ø124 mm)

Irradiance: 295W/m²

Supply circuit:
100 - 240 VAC, 50/60Hz

Fuse rating:
2.5 Amp/250VAC

Power Supply:
100W

Light head power consumption:
54W @24VDC
