Patient Stretcher

Ideal for patient transport, examination and intubation.

The DRE Savoy QA3 stretcher is ideal for patient transport, examination, and intubation. Its compact construction is lightweight yet robust, and its advanced steering system and ergonomically positioned pulling handles make it supremely maneuverable and easily guided by one person. The Savoy QA3 has a wider patient platform, pressure care mattress, and unique foldaway patient safety rail that store away under the mattress footprint to give a virtually zero transfer gap. The exceptional low height capability allows easy mount and dismount, particularly helpful for elderly patients, while the improved ground clearance allows better access for patient hoists.

Fixed Transfusion Poles -

innovative quick release safety locking mechanism that integrates into either head or foot end of patient safety rail for easy access and storage. Head end comes standard.

Vertically Operated Patient Safety Rails-

store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation.

Pneumatic assisted back lift -

unique design, precision controlled, easy lift system for enhanced user and patient comfort

Hydraulic Lift Mechanism -

exceptional low height capability, adjusted by means of independently operating pedals located on both sides of the stretcher.

5th Wheel Steering -

unique mechanism which ensures stretcher is highly maneuverable and easily guided by one person.

Castors -

polyurethane tires offer low rolling resistance for high maneuverability, 6 in (150mm) castors fitted as standard, 8 in (200mm) optional.

Trendelenburg

Extremely smooth and controlled mechanism that allows rapid Trendelenburg to be achieved even when stretcher is at its lowest height.

Pushing Handles

Four ergonomically positioned pushing handles give supreme maneuverability either with the patient lying flat or sitting up. (Foot end fixed handles are optional, head end come standard)

Patient Comfort

Exceptional low height capability and store away patient safety rail allow easy mount/dismount particularly for elderly patients. Wider patient platform and pressure care mattress ensure maximum patient comfort. Improved ground clearance allows better access for patient hoists.

Optional Extras

8 in (200 mm) Castors

Emergency Venturi Suction System

Foot End Stop/Monitor Shelf

Fixed Pushing Handles Foot End

Reversible Pillow

Foot-end Mattress Protector

Optional Extras

Reverse Trendelenburg

Endoscopy – increased maximum height 4 in

Spare Fixed Transfusion Pole

Gray Patient Safety Rail Covers

Department Identification

K8 Pressure Care Mattress – zip cover

Patient Storage Container

Lateral Cassette Holder

X-Ray Tray

X-Ray Tray Guides

Oxygen Cylinder Bracket – for CD systems

Specifications

- » Overall Length: 7 feet
- » Overall Width: 2.4 feet
- » Height Range (non x-ray): 18.5"-30.5" (475-775 mm) (excluding mattress)
- » Height Range (x-ray): 20.5"-33" (520-840 mm) (excluding mattress)
- » Height Range (Endoscopy non x-ray): 20.5" – 34.5" (525-875 mm) (excluding mattress)
- » Stretcher Weight: 282 lbs, 326 lbs for emergency package
- » Maximum Patient Weight: 705 lbs

Pushing Handles - four ergonomically positioned pushing handles give supreme maneuverability either with the patient lying flat or sitting up.

Trendelenburg - extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when stretcher is at its lowest height
