The Opportunity

A Need for Quality Equipment from a Reliable Company

Obaatan PA Women's Hospital offers outpatient services, preventive care, and gynecologic procedures to women in Ghana. The hospital also features a fully functional operating room for obstetric patients requiring delivery by Cesarean section. Additionally, Obaatan provides inpatient care 24 hours a day, 7 days per week. A major challenge for Dr. Laing and many medical professionals in Ghana is finding affordable medical equipment from a trustworthy company.

Our Solution

Affordable Products from Trusted Professionals

Dr. Laing has spent her professional life fostering women's health. Through her training at the University of Ghana Medical School, her teaching experience at Korle-Bu, and 15 years practicing Obstetrics and Gynecology in the USA, Dr. Laing recognizes the importance of affordable, high quality medical equipment.

The task of sourcing equipment for a first-class hospital like Obaatan was a challenge even for a seasoned practitioner and researcher like Dr. Laing. Like many healthcare providers, she wanted state-of-the-art technology and excellent service at a discounted price. Most important, she was looking for a company that she could trust.

Fortunately, DRE Medical satisfied all of Dr. Laing's needs. Conveniently located in Louisville, Kentucky, DRE supplied Dr. Liang with lighting, infant care equipment, cautery equipment and many other items for the hospital. Most important, Dr. Laing knows that she can depend upon her trusted Account Executive, Amanda Cannady, for prompt service and support.
